Education

Bachelor of Computing, Software Engineering (Co-op)

Sept 2024 – Expected Apr 2029

University of Guelph

- Area of Emphasis: Artificial Intelligence

Work Experience

Full Stack Software Developer Co-op

Toronto, ON / Remote

FreshBooks

Sept 2026 – Present

- Contribute to the Payments and Payroll Engineering team by developing and maintaining full stack applications for FreshBooks' financial platform serving **millions** of active users.
- Implement and test production code across frontend and backend systems, write automated tests, participate in code reviews, and use **Docker** for containerized development environments.
- Collaborate with engineers and cross-functional teams across **North America** and **Europe** to develop, review, and deliver reliable product features on schedule.

Web Applications Developer Co-op

Mississauga, ON / Hybrid

Kenna

May 2026 – Aug 2026

- Developed and maintained full-stack web applications for enterprise clients, including campaign sites, internal tools, and client-facing workflows supporting **20,000+** active users across the U.S. and Canada.
- Optimized features using modern technologies, improving performance by **30%** and strengthening security.
- Collaborated across engineering, QA, and design using Git, Jira, code reviews, testing, and CI/CD to ship production

Projects

PosturePal

May 2026

React, Vite, Tailwind CSS, MediaPipe Pose, Firebase Auth, Firestore

github.com/hayamahmoudd/PosturePal

- Developed a webcam-based posture coaching application using **MediaPipe** Pose to analyze and score posture.
- Implemented personalized calibration, configurable thresholds, and real-time alerts using banners, audio and push notifications.
- Built session history, posture score trends, leaderboards, and social features using **Firebase** Authentication and **Firestore**.

Pray360

Jan 2026

TypeScript, React, MapTiler, Fastify, PostgreSQL, Docker

github.com/hayamahmoudd/Pray360

- Built a platform for discovering and reviewing prayer spaces using **React**, **Fastify**, and **PostgreSQL**.
- Designed validated REST API endpoints with structured error handling and containerized backend services using **Docker**.
- Earned **3rd** place for Open Innovation.

ShelterMap Toronto

Nov 2025

Python, Next.js, React-Leaflet, Google Cloud, BigQuery, Docker

github.com/hayamahmoudd/ShelterMap

- Developed a **Python** data pipeline and interactive **Next.js/React** map to identify high-priority shelter placement zones across the Greater Toronto Area.
- Processed public datasets using **BigQuery**, deployed containerized services on **Google Cloud Platform**.
- Received a **Best Use of Google Cloud** nomination.

Technical Skills

Languages: Java, Python, C, C#, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks: React, Next.js, Node.js, Fastify, Vite, Tailwind CSS, Firebase

Cloud and Tools: Google Cloud Platform, BigQuery, Docker, AWS, Git, Linux/Unix, Bash, Jenkins, Jira, VS Code, Valgrind

Concepts: Data Structures and Algorithms, OOP, REST APIs, Relational Databases, CI/CD, Unit Testing, Agile/Scrum

Awards & Achievements

University of Guelph's CEPS Dean's Honours List (4x)

Sep 2024 – May 2026

- Recognized for achieving an average of **80%+** per semester.
